

# DELIVER EXPERT REMOTE NEUROLOGY CARE ANYTIME, ANYWHERE

When three out of four hospitals lack 24/7 EEG coverage, patients wait longer for critical care. Expanding your reach isn't just an option — **it's essential.**

**74%** of hospitals

lack 24/7 access to EEG technologists<sup>1</sup>

**22%** more transfers

of status epilepticus patients in hospitals without EEG services<sup>2</sup>

**\$2,750** in savings

and \$1,415 in revenue gained per avoided transfer from continuous EEG implementation<sup>3</sup>

Live View Panel Pro is an advanced remote monitoring platform that lets neurology specialists care for more patients in more locations—all managed from a single, customizable patient monitoring panel. **This powerful solution helps teams maximize their expertise, streamline workflows, and respond quickly to real-time patient data.**

Different Thinking for Better Healthcare

## Expand your reach

Extend care to any location with remote monitoring and direct audio communication.

## Optimize resources

Leverage staffing efficiently while reducing transfers and maintaining quality care.

## Enhance decision-making

Make faster, better-informed decisions with real-time patient data.

See how Live View Panel Pro™ can help you deliver better patient care.

Scan to see how your team can care for more patients with less stress and strain.
