Every minute counts when your network goes down

When patient monitoring networks fail, every second puts care and revenue at risk. Prevent costly disruptions before they occur.

$7,900

lost per minute during network downtime[1]

$690,204

average cost per data center outage[1]

$1,734,433

in maximum cost of unplanned network downtime[1]

Here's what's at stake:

**Missed or delayed patient care alerts and critical information access**

Per-minute revenue loss and compliance violation costs

Manual troubleshooting and system recovery time

Patient data protection and hospital reputation
