

# NK NetworkCare™

Your 24/7 Network Co-Pilot and Guardian

## Keep your network running smoothly and securely

Healthcare networks require multiple systems to protect patient data and ensure continuous monitoring.

NK NetworkCare™ combines these essential tools into one unified solution—tested and validated for your Nihon Kohden systems—to deliver maximum uptime, comprehensive security, and more efficient operations.

## Core Components

### Network Management System (NMS)

Monitors and optimizes network performance

### Security Information and Event Management (SIEM)

Provides enterprise-level security monitoring

### Network Threat Appliance (NTA)

Delivers advanced threat prevention

## Key Benefits

- ✓ Fully integrated solution that maintains equipment performance
- ✓ Complete security capabilities from industry leaders
- ✓ Real-time visibility across your network
- ✓ Faster issue resolution through one point of contact

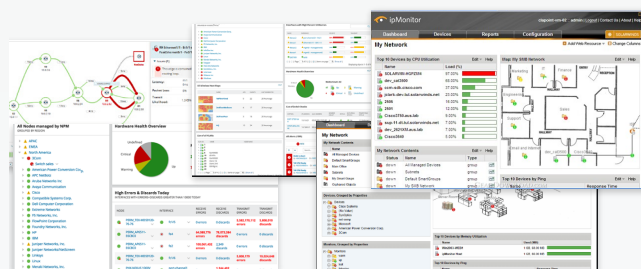

# All of the systems you need to monitor, maintain and secure your network.

## Network Management Systems (NMS)

A comprehensive system that monitors and optimizes network performance to ensure maximum uptime.

### NMS Features

01. Network monitoring and analysis
02. Device detection and management
03. Performance optimization
04. Fault detection and resolution

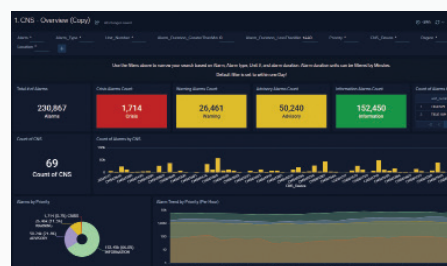

## Security Information and Event Management (SIEM)

Enterprise-level security monitoring that provides real-time insight and tracking of network activities.

### SIEM Features

01. Real-time threat monitoring
02. Security event correlation
03. Incident response management
04. Compliance reporting and tracking

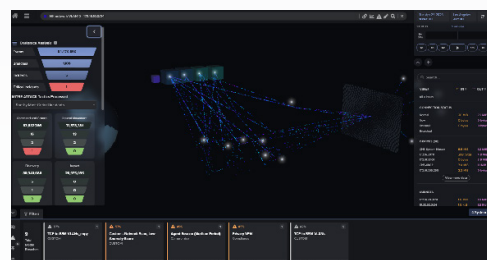

## Network Threat Appliance (NTA)

Advanced threat prevention system that analyzes, identifies, and eliminates security risks in real-time.

### NTA Features

01. Real-time threat analysis
02. Proactive threat response
03. Behavior analytics
04. Security operations support
