

# NK NetworkCare™

ALL-IN-ONE SOLUTION  
FOR NETWORK RELIABILITY

---

# Healthcare Networks Face Growing Risks

The stakes are higher than ever for patient care networks.

## Security & Compliance

- **Rising cybersecurity threats** targeting healthcare
- Increasing **data protection** requirements
- Risk of costly **compliance violations**

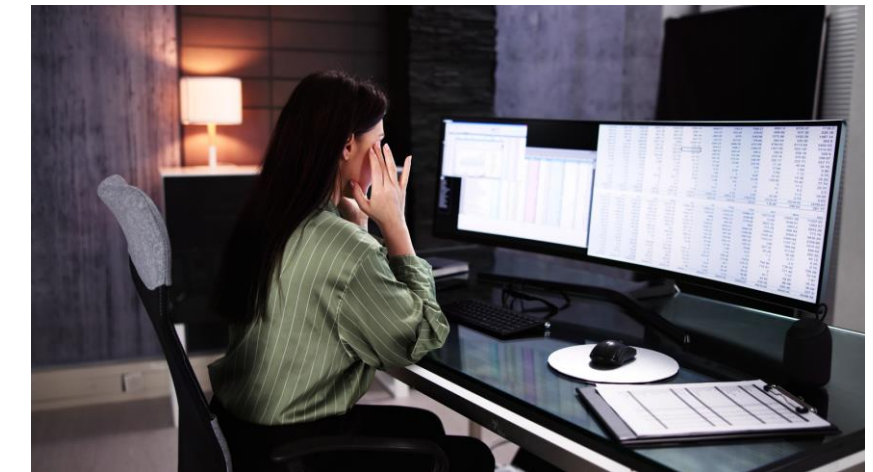

## Financial Impact

- **\$690,204** average cost per data center outage<sup>1</sup>
- **Unplanned operational costs** straining budgets
- **Revenue loss** from system disruptions

## Operational Efficiency

- **Growing workload** with limited IT resources
- **Complex system management** demands
- Time-consuming **manual processes**

These challenges demand solutions that **protect your patients, operations, and bottom line.**

# The Cascading Cost of Network Failure

When networks fail, the impact extends beyond downtime.

- Delayed access to critical patient monitoring data
- System recovery and maintenance costs
- Network security vulnerability exposure
- Impact on hospital efficiency

## \$45-\$95

cost per square foot of data center<sup>1</sup>

## \$690,204

average cost per data center outage<sup>1</sup>

## \$1,734,433

maximum cost of unplanned network downtime<sup>1</sup>

<sup>1</sup>Ponemon Institute, 2013 Cost of Data Center Outages Study

# Prevent Network Failures Before They Happen

Stop costly downtime and protect your patient care delivery.

Maximize uptime

## Continuous Monitoring

Minimizes uninterrupted care

Enhance security

## Active Protection

Limits security threats

Increase efficiency

## Smart Management

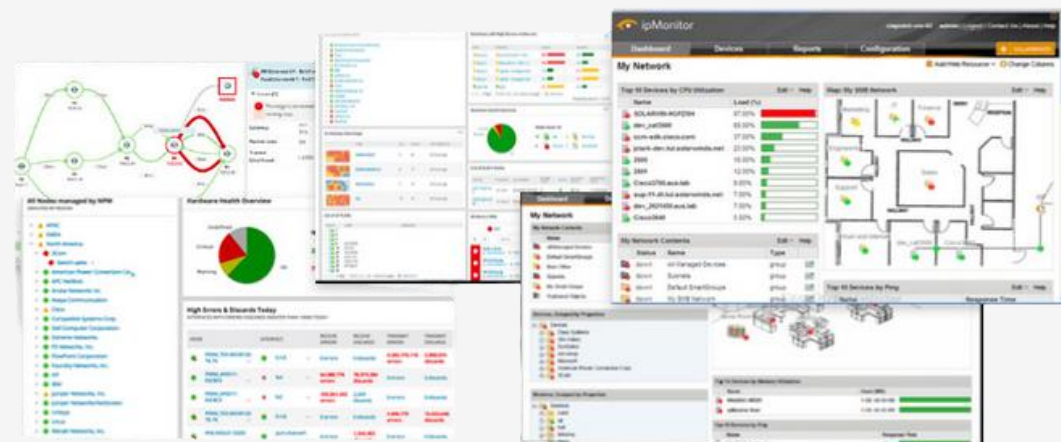

Automates security operations

## NK NetworkCare™

All-in-one network monitoring and protection platform

# How NK Network Care™ Protects Your NK Network

Your network protection at a glance.

## Monitoring Dashboard

*Watch your network health in real time*

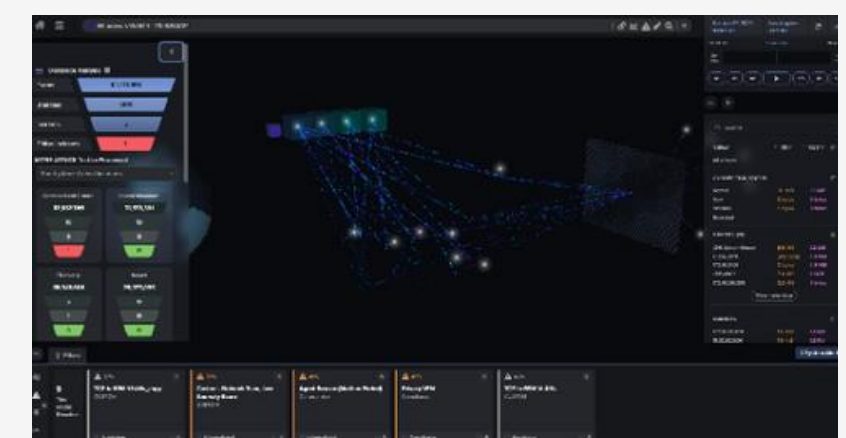

- Live system status tracking
- Instant device monitoring
- Smart alerts when issues arise
- Easy-to-read performance data

## Protection Activities

*Block threats before they impact care*

- Active threat detection
- Real-time security scanning
- Automatic updates
- Breach prevention

## Management Console

*Resolve issues faster*

- Quick problem resolution
- Automated maintenance
- Health report tracking
- Compliance monitoring

# Get Started with **NK NetworkCare™**

## **01. Initial System Review**

*Evaluation of your current NK environment*

## **02. Clear Quote & Setup**

*Transparent pricing and straightforward deployment*

## **03. Continuous Protection**

*Automated system monitoring and regular reviews*

**Ready to see NK NetworkCare™ in action?**
